

Investment Objective

For a cautious investor seeking to protect their wealth. They are more interested in avoiding losing money than in maximising potential investment gains. They are prepared to tolerate small fluctuations in the value of the portfolio in order to potentially achieve greater investment returns than a bank or building society deposit. Equity exposure is likely to range between 0-30%.

Past performance is not a guide to future performance. The value of investments and any income from them can fall and you may get back less than you invested. If you invest in currencies other than your own, fluctuations in currency value will mean that the value of your investment will move independently of the underlying asset. Investors should be aware of the additional risks associated with funds investing in smaller companies.

MPS Low to Medium Risk

Investment Objective

For a conservative investor seeking to maintain their capital. They are prepared to accept a lower investment return than equity markets over the longer term in exchange for trying to minimise potential losses. They accept that the portfolio will be subject to fluctuations in value over the medium-to-longer term. Equity exposure is likely to range between 30–55%.
